

TYPOGRAPHY

Our typographic system is built on legibility and accessibility. It's clear, bold, and — when we use our international glyphs — endlessly expressive.

APPROACH

One account, all kinds of money

For people who use money,
wherever they go.

Inter

Use Inter for most things. It's clean and legible in both headings and body copy.

Wise Sans

Our display font is clear and bold. Use it for short and sweet headlines — usually to celebrate or shout about something.

SENT

International glyphs

A range of glyphs, for when you need even more expression. Use them big, use them bold, and use them sparingly.

Alignment

You should left-align or centre text in Inter. But right-align it if you're using a right-to-left language. And keep line lengths between 50 and 60 characters.

Things to avoid

Inter is versatile enough to apply in a variety of ways. But also versatile enough to get it wrong.

Here are some mistakes to avoid.

**ONE

Using Wise Sans in product

Use Wise Sans for key success and selling moments to add that extra bounce to our brand. It's designed to be short, sharp and stand out. Like a pinch of spice to give a little flavour, we don't want to overdo it.

Key moments include:

- success screens — wham, bam, thank you ma'am
- success progress screens — let users know what's cooking
- feature intro screens — all caps for all aboard

It can also be used sparingly across product to enhance key brand features where relevant, these can be reviewed on a case by case basis.

Headline alignment

Wise Sans is one of our most distinctive brand elements. It speaks for us when we're not in the room, so it's essential that it's free to express itself.

You can align headlines any way you want — just make sure they're always clear.

A light gray rectangular area with a vertical dashed line on the left side. The words "LEFT" and "ALIGNED" are written in a large, bold, dark green sans-serif font, stacked vertically and aligned to the left of the dashed line.

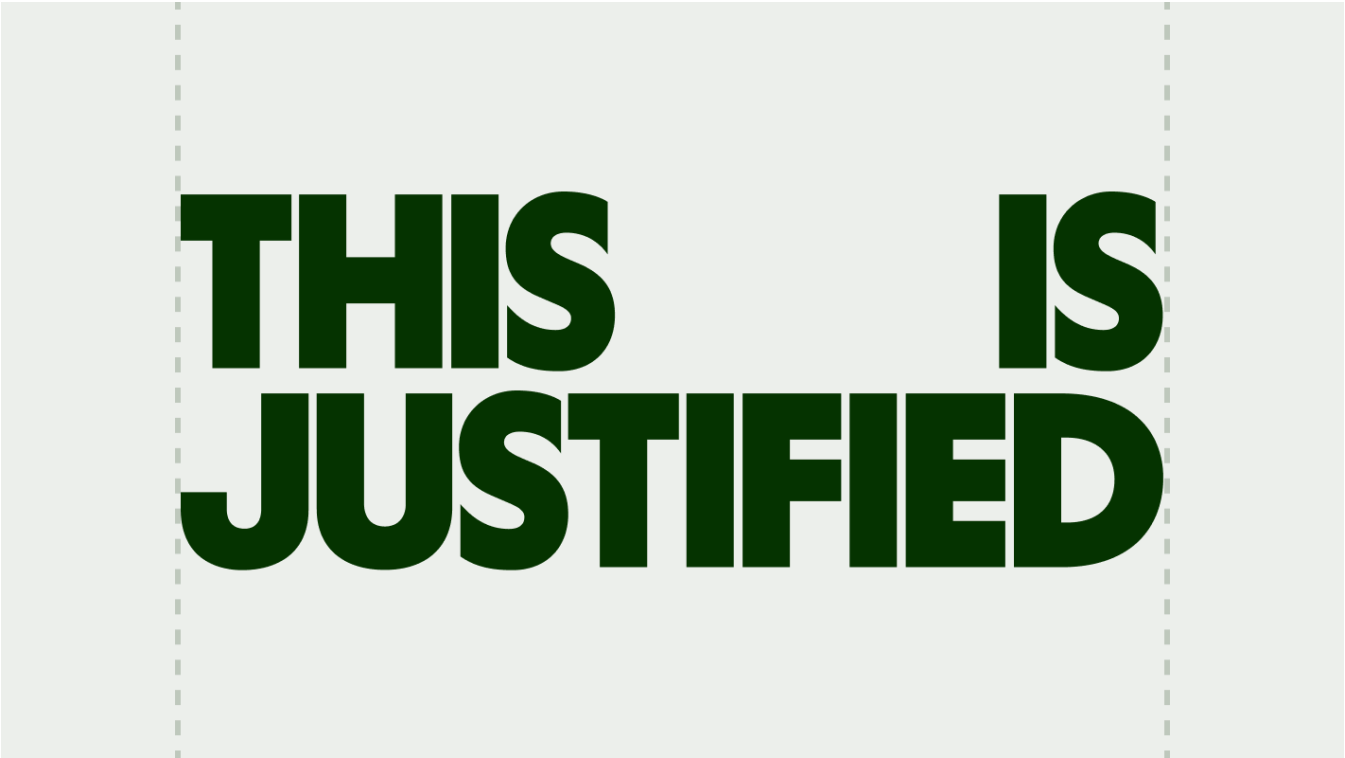

**LEFT

Wise Sans on tapestries

You can use Wise Display with tapestries — as a background or a mask — to make messages even more expressive and vivid.

Go to [tapestries](#) guidance.

INTERNATIONAL GLYPHS

When you want typography brimming with character from the world over, use international glyphs.

If you're using longer text or talking about a more serious topic, it's best to stick with clean Wise Sans. But if you find yourself with a short, punchy headline that you want to celebrate, give it that extra moment of surprise with international glyphs.

- ✓ Use international glyphs for large, expressive headlines.

- ✓ Use international glyphs to enhance a message.

Using multiple glyphs

International glyphs are like seasoning — don't overdo it. As a general rule, allow yourself 3 letters to swap out for custom glyphs. But always use your own judgement.

✗ Don't use international glyphs for every possible letter.

Repeating glyphs

Pay special attention to frequent repeating glyphs. For simpler alternates, like our E, feel free to replace every E in a headline to give it consistency.

But for more distinct letters, like our L, it's best not to go overboard and hinder legibility. Stick to peppering in 1 or 2 for complex glyphs.

- ✓ Repeat glyphs in a balanced and considered way.

✗ Don't repeat glyphs too much as this hinders legibility.

Accents

International glyphs also work with accents, so don't forget to use them when appropriate.
